**Subject:** The underlined parts are okay..with one correction

The narrative is not specific to color, but is used to address color, so I would refer to it just as a **narrative criterion** or you could call it a **'free from narrative'**. The original language is:

*All waters shall be free from oil, scum, and floating debris associated with municipal or domestic sewage, industrial waste or other discharges in amounts sufficient to be unsightly or to interfere with legitimate water uses.*

It is being changed to:

*All waters shall be free from oil, scum, and floating debris associated with municipal or domestic sewage, industrial waste or other discharges in amounts sufficient to be unsightly or to unreasonably interfere with ~~legitimate water~~ the designated use of the water body.*
